COMPETITIVENESS

# 2003 Economic Impact of the University of Central Florida on the Central Florida Economy 

Executive Summary

The University of Central Florida’s 2003 direct spending and employment has resulted in millions of dollars in additional regional spending and thousands of additional jobs. The data used for this analysis is taken from the UCF 2003 Annual Financial Report and information provided by University Relations. The report measures UCF's influence (impact) on the region's economy with an input/output analysis. The impact is calculated using multipliers built into the well known IMPLAN ${ }^{\mathrm{tm}}$ analysis tool. The ripple effect generated by UCF's presence is very strong and has a dramatic impact on many people and industries. This analysis demonstrates that UCF's combined output "impact", including direct, indirect, and induced expenditures, is 1.277 billion dollars. It is further estimated that the employment impact including direct, indirect, and induced employment supports a total of 19,268 jobs.

The impacts are summarized in the following three tables:
Table 1
Impact on Regions Output

| Direct Impact on <br> Output $^{-1}$ | Indirect and <br> Induced Impact | Total Impact on <br> Output |
| :---: | :---: | :---: |
| $\$ 529,186,244$ | $\$ 748,555,580$ | $\$ 1,277,741,824$ |

- UCF through operating expenditures and capital improvements injected \$529 million into the regional economy in 2003.
- The direct impact of UCF's operating expenditures and capital improvements created additional output via the "ripple effect" of \$748 million in 2003.
- UCF's combined impact on the economic output of the region is estimated at \$1.277 billion for 2003.

[^0]
# UNIVERSITY OF CENTRAL FLORIDA <br> INSTITUTE FOR ECONOMIC <br> COMPETITIVENESS 

Table 2
Impact on the Region's Employment

| Direct Impact on <br> Employment $^{2}$ <br> 10,181 | Indirect and <br> Induced Impact | Total Impact on <br> Employment |
| :---: | :---: | :---: |
| 9,086 |  | 19,267 |

- UCF with its component units and construction endeavors provided an estimated 10,181 fulltime jobs in 2003.
- The direct impact of UCF's 10,181 full time jobs supported an additional 9,086 full-time jobs within the region.
- UCF is responsible directly and indirectly for supporting a total of 19,268 jobs within the region.

## Table 3

Value Added to the Region

| Direct Value <br> $\underline{\text { Added }}$ | Indirect and <br> Induced Value | Total Value <br> $\underline{\text { Added }}$ |
| :---: | :---: | :---: |
| $\$ 333,086,912$ | $\$ 458,771,603$ | $\$ 791,858,515$ |

- Central to an impact analysis is the value that is added to a region. "Value Added" is a component of the output impact. It is very similar to the concept of Gross Domestic Product and includes employee compensation, proprietary income, and indirect business taxes. Basically, value added measures that part of the economic output that is created or added by the activities associated with the direct economic entity, i.e. the University of Central Florida in this analysis.

[^1]
## UNIVERSITY OF CENTRAL FLORIDA <br> INSTITUTE FOR ECONOMIC <br> COMPETITIVENESS

It is generally recognized that the Central Florida Research Park jobs and wages and their subsequent impact on the regional and state economies are dependent on the strong relationships between UCF and the businesses located in the Central Florida Research Park. The impact of the Research Park has not been included in the analysis presented here. However, it is entirely reasonable that the economic impact of the Park should be included in any future analysis of the impact of the University on the community. A preliminary analysis of the combined Research Park and University impact is available in a separate document at www.iec.ucf.edu.

This is the first analysis in what is anticipated to be a series of Economic Impact investigations that will be performed to a standard that enables applicable comparisons, while minimizing subjective bias issues that inherently occur within studies based on traditional survey methods.

## Introduction

One approach for obtaining a more comprehensive view of a university's influence on the local community is an economic impact study based on input/output analysis. The input/output analysis measures the tangible economic benefits in terms of jobs, wages, income, and tax revenues that are associated with the university. The analysis allows researchers to quantify the effects of a particular activity on a region's economy, thus providing guidance for making policy that directs investment and promotes growth. Further, the methodology allows direct comparison to other universities as well as private enterprises.

This report investigates the impact of the University of Central Florida. The selection of UCF is important because it not only provides income and jobs but it also serves as a catalyst for further diversifying and growing the Central Florida economy. This is illustrated by the changes in the distribution of the labor force. A comparison between the 1990 and the 2003 employment distribution ${ }^{1}$ of the Orlando MSA indicates that the distribution of employment is changing.

[^2]Table 1

## Orlando MSA

|  | Employment |  |
| :--- | :---: | :---: |
|  | Employment | Employment |
|  | Distribution | Distribution |
|  | $\underline{1990}$ | $\underline{2003}$ |
| Construction and Mining | $6.42 \%$ | $6.27 \%$ |
| Manufacturing | $8.40 \%$ | $4.49 \%$ |
| Trade, Transportation and Utilities | $20.31 \%$ | $18.91 \%$ |
| Information | $2.71 \%$ | $2.54 \%$ |
| Financial Activities | $6.53 \%$ | $5.71 \%$ |
| Professional and Business Services | $11.15 \%$ | $16.98 \%$ |
| Educational and Health Services | $7.90 \%$ | $9.93 \%$ |
| Leisure and Hospitality | $20.57 \%$ | $18.77 \%$ |
| Other Services | $4.02 \%$ | $5.13 \%$ |
| Government | $11.99 \%$ | $11.26 \%$ |

The data shows that the Manufacturing; Trade, Transportation and Utilities; and Leisure and Hospitality sectors are decreasing while Professional and Business Services; and Educational Health Services are increasing. These changes indicate that catalysts for employment diversification are in place. UCF is a major source of employment diversification in the region. Moreover, UCF is an important catalyst that has a critical role in the future diversification of the regional economy.

## Impact Area

The University of Central Florida main campus sits upon 1,250 acres situated on the East side of Orange County, Florida. The main campus is strategically located, adjacent to the Central Florida Research Park and in good proximity to both the Space Coast and the economic center of the Orlando MSA (i.e. the City of Orlando). While most expenditures are made at the main campus, the regional campus network extends UCF's economic reach beyond Orlando: east to Brevard County (i.e. the space coast), south to rural Polk County, and north to Volusia County; therefore, the majority of the economic impact of UCF is within the Orlando MSA, including Volusia, Brevard, and Polk counties.

## Data

Data was gathered from the public financial records reported by the University of Central Florida to the State. The data was summarized beginning in the fiscal year ${ }^{2} 1970$ and ending in the 2003 fiscal year, see Appendix IIIA, IIIB, and IV. These financial statements are normalized ${ }^{3}$ for summary across years. Figure 1 demonstrates the exponential nature of UCF's growth in revenue and expenditures. Typically a space between the revenue line and the expenditure line indicates profit; however with public entities the space represents monies available to expend on asset creation or "addition to assets." From the normalized summaries, values that are applicable as inputs to the impact model can be extracted.

[^3]As can be normalized by UCF's financial statements, the data is comprised of two categories: "functional expenses" and "addition to assets." The functional expenses are on-going and will tend to fluctuate from year to year depending upon growth in public funding. Since 1970, UCF has had an $11.4 \%$ compound average annual rate of growth in its functional expenses. The addition to assets captures the monies spent to increase the capacity of the University, such as new buildings and other infrastructure. These values will not occur on a consistent basis from year to year. Additions to assets will occur if there is a need and there are sufficient funds available to address the need. Functional expenses are those categories identified by the National Association of College and University Business Officers (NACUBO). The normalized statements give expenses by categories, including one labeled other expenses for any monies that do not fall into the NACUBO definitions. Additions to assets are simply the additional money spent in a given year on assets. These values ignore any deleted assets that were sold or salvaged by UCF, however for this analysis expenditures only were used.

For the fiscal year 2003, UCF expended $\$ 450,049,683$ in functional expenses and invested/spent $\$ 119,254,804$ in additions to assets. These expenditures are the direct economic impact of UCF on the region for 2003:

Table 2
UCF 2003 Direct Economic
Impact

Future expenditures on assets can be found from the UCF Master Plan, since the annual average compound growth of functional expenses is known, the future impact that UCF will have on Central Florida can be estimated and compared. Keep in mind that these
future projections are speculative and are based upon UCF following the UCF Master Plan "Future Project Projections", see Appendix V. Although functional expenses have been increasing by an average annual rate of 11.4 percent, it is anticipated that this will slow due to an expected decrease in enrollment growth. As such, for a conservative projection this rate has been halved to 5.7 percent. A conservative projection allows that one can expect the future values to be at least equal to the actual values that develop.

## Table 3

## UCF Projected Future

## Direct Economic Impact

| Year | Projected Functional | Projected Future Addition | Total Anticipated Direct |
| :--- | :---: | :---: | :---: |
|  | Expenses (current \$) <br> to Assets (current \$) | Impact (current \$) |  |
| $2004-2005$ | $\$ 502,817,558$ | $\$ 146,617,631$ | $\$ 649,435,189$ |
| $2005-2006$ | $531,478,159$ | $98,862,802$ | $630,340,961$ |
| $2006-2007$ | $561,772,414$ | $68,519,381$ | $630,291,795$ |
| $2007-2008$ | $593,793,442$ | $48,420,000$ | $642,213,442$ |
| $2008-2009$ | $627,639,668$ | $40,970,000$ | $668,609,668$ |
| $2009-2010$ | $701,229,791$ | $52,100,000$ | $715,515,129$ |
| $2010-2011$ | $709,230,427$ | $8,070,000$ | $709,299,791$ |

## Methodology

This report measures UCF's influence on the local community using economic impact input/output analysis, which measures the tangible economic benefits in terms of jobs, wages, income, and tax revenues that are associated with the University's expenses and investments. Specifically, the financial data was analyzed with Leontiff-Input Output modeling procedure, using IMPLAN ${ }^{\text {TM }}$ software to perform the matrix algebra
calculations. The most current IMPLANTM model is based on the most current ES202 data released from the U.S. Bureau of Labor Statistics.

The total impact of UCF on the region's economy is measured using the millions of dollars directly injected into the economy. The complex set of economic interactions that will be stimulated by these sources of impact were identified and accumulated by input/output analysis to determine the total effect on the region's employment, wages, and production. This is also referred to as the Multiplier Method.

The multiplier measures the impact of exogenous spending in the economy by adding up all the successive rounds of re-spending. Direct effects account for income generated as contractors, and employees make purchases from local sources. Indirect effects occur as local suppliers, which support these activities, make purchases from all other enterprises in the region. Also included in the indirect effects are the household income and spending generated through the additional earnings. These are referred to as induced effects. The multipliers indicate the amount of income, wages, and employment that are generated per dollar of related spending.

IMPLAN ${ }^{\text {TM }}$ provides three types of multipliers called Type I, Type II, and Social Accounting Method (SAM). Given that the impact region has a service based economy, and because Type I and II multipliers are better suited for analyzing an industrial/manufacturing base, the selected multiplier is the Social Accounting Method (SAM), which takes into account the payments made to households and businesses.

## UCF 2003 Impact

The total economic impact of the University of Central Florida on the region is summarized below. The input/output model for the region calculates that the impact in 2003 was 19,268 jobs, $\$ 791$ million in value added, and nearly $\$ 1.3$ billion in output. Indirect tax receipts are higher by $\$ 16.6$ million for state and local governments. The total tax impact of UCF in 2003 is $\$ 193$ million.

## Table 4

## 2003 Economic Impact

## $\underline{2003}$

| Total Economic Output Impact of UCF on the Central Florida Region | $\$ 1,277,741,824$ |
| :--- | :--- | :--- |
| Total Employment Impact of UCF on the Central Florida Region | $\mathbf{1 9 , 2 6 8}$ |
| Total Value Added by Impact of Output on the Central Florida Region | $\$ 791,858,515$ |
| Total Tax Impact of UCF on the Central Florida | $\$ 193,401,336$ |

## Summary and Comparison

Utilizing the same methodology for inputs in 1998 as in 2003, the 1998 impact of UCF is also calculated for purposes of comparison. Because financial statements are used these values are directly comparable, as opposed to using survey data collected in each year.

This 2003 impact of UCF is also comparable to what is expected to happen in the future, on the basis of the UCF Master Plan. Taking the forecasted data contained in Table 3,
the anticipated future impacts of UCF on the Central Florida economy are compared to the 1998 impact and the 2008 impact in Figures2 and 3.

## Summary of UCF's Normalized Statements of Revenues, Expenditures, and Other Charges

For Fiscal Years 1974-03, EndingJ une 30

[^4]Expenditures for Educational and General with Mandatory Transfers: Educational and General Instruction
Research
Research
Public Service
Academic Support
Student Services
Institutional Support
Operation and Maintenance of Plant
Loan Operating Expense
Depreciation
Total Education and General
Mandatory Transfers for:
Loan fund Matching Grant
Tot Mandatory Transfers

## Auxiliary Enterprise

Expenditures
Mandatory Transfer, Principal and Interest
Mandatory Transfer, Renewals and Replacements
Total Auxiliary Enterprises
Total Expenditures and Mandatory Transfers
Transfer and Additions/Deductions Excess of Rest. Receipts over Tsfrs to Revenue Refunded to Grantor
Inter-fund Transfers
Transfers to/ from Comp Units/ Primary Gov.
Resources remitted to BOR/ Univ
Total Other Tsfrs and Additions/Deduction
Net Increase/(Decrease) in Fund Balance
Notes:
All data was obtained from the Statement of Revenues, Expenditures, and other
charges for the period in which the income statement was issued
following year's comparison was not always the same; therefore was not used.

## Appendix IV

## Summary of UCF's Normalized and Combined Balance Sheets

For the Fiscal Years Ending J une 30

## Liabilities

Payables
Due To Other Fund Groups
Due To Other SUS Universities/ BOR
Deposits Payable
Accrued Liabilities
Due to DOE
Due to State Treasurer
Due to Federal Government
Obligations Under Capital Lease
Deferred Revenues
Consolidated Equipment Financing Program
Revenue Certificates and Bonds Payable
Installment Purchase Notes Payable
Compensated Absences Liability

## Total Liabilities

## Fund Balances

Reserve for Encumbrances
Restricted Fund Balance
Unrestricted Fund Balance
Allocated Fund Balance
Unallocated Fund Balance
Retained Earnings
Amount Expected to be Financed
Contributed Capital
Federal Gov't Grants Refundable
Reserve for Renewal and Replacement
Net Investment In Plant

## Total Fund Balance

Total Liabilities and Fund Balance

Projects to be programmed
Projects with approved building programs
Funding by Community College (No UCF involvement)

Remodeling denotes change in space usage.
Renovation denotes no change space usage

## Appendix VI

## Interesting Facts about UCF

The University of Central Florida is one of the fastest growing, metropolitan research universities in the country - and it is located in Orlando, one of the most dynamic metropolitan areas in the U.S. The following information includes interesting facts about UCF:

- Fall 2003 Employment
Faculty and Staff (Betty R. Miller, Coordinator, Office of Institutional Research, UCF.) ..... 9,144
Construction, Technology Incubator Clients, Vendor* ..... 1,266
Total ..... 10,410
Central Florida Research Park ..... 9,400
(Joe Wallace, Executive Director, Central Florida Research Park, UCF)
*(Melissa Debach, Marketing Manager, UCF Technology Incubator and Pete Newman, Facilities Planning.)
- Student Credit Hours 2002-2003)
Total Annual Student Credit Hours 2002-2003 ..... 82,930
Headcount ..... 41,102
(Sabrina Andrews, Director, Office of Institutional Research, UCF)
- Students by Country of Origin Countries Represented ..... 147
(Sabrina Andrews, Director, Office of Institutional Research, UCF)
- Students in Residence ..... 400
UCF Affiliated Housing (Jeff Novak) ..... 3,481
On-Campus (Peter H Mitchell, Jr, Associate Director, University Housing, UCF) ..... 3,797
Total ..... 7,678
- Head Counts of Students Attending Each Region
Central ..... 283
Eastern ..... 2,854
Southern ..... 2,653
Western ..... 1,371
Total Satellites ..... 7,161
Main Campus ..... 33,941
Total UCF ..... 41,102
(Sabrina Andrews, Director, Office of Institutional Research, UCF)- Concession SalesConcession Sales\$181,478
Other Sales ..... \$914,827Total

## Appendix VI

- Visitors Count
UCF Arena managed Areas (Terry Genovese, CFE, Director, UCF Arena) 238,209
Other Areas $\underline{17,143}$
Total 255,352
- Alumni Base
Florida 79,970
United States (not including Florida) 36,139
Abroad $\underline{34}$
Total 116,143
(Andrew Freeland, UCF Alumni Association, UCF)

[^0]:    ${ }^{1}$ The direct Impact Region is comprised of Orange, Osceola, Polk, Seminole, Volusia, and Brevard Counties

[^1]:    ${ }^{2}$ The direct employment number shown here is calculated by the IMPLAN model on the basis of expenditures for an organization and is a very close representation of the real physical employment.

[^2]:    ${ }^{1}$ U.S. Bureau of Labor Statistics, Employment, Hours, and Earnings from the current Employment Statistics Survery.

[^3]:    ${ }^{2}$ Fiscal Year ending June 30.
    ${ }^{3}$ Normalized financial data has been aggregated and disaggregated to summarize across time, as well as the combining of categories only when to do so would not alter the purpose of the normalization.

[^4]:    Revenues:
    Educational and Genera
    Government Appropriations - State
    State Contracts, Grants and Gift
    Federal Contract, Grants and Gifts
    Private Contract, Grants and Gifts
    Private Contract, Grants and Gift
    Investment Incom
